GENERAL INTRODUCTION

Key References

This document provides guidance to all Families, Early Year's Practitioners and Health and Social Care Professionals. To support planning and decision-making for special educational needs and disability (SEND) in relation to children who are eligible for funded nursery education. In developing this guidance consideration has been given to the principles and processes outlined in the following key documents:

1. The Early Years Foundation Stage: *Statutory Framework for the Early Years Foundation Stage: Setting the standards for learning, development and care for children from birth to five. 2014*

The Early Years Foundation Stage

Every child deserves the best possible start in life and the support that enables them to fulfil their potential. Children develop quickly in the early years and a child's experiences between birth and age five have a major impact on their future life chances. A secure, safe and happy childhood is important in its own right. Good parenting and high quality early learning together provide the foundation children need to make the most of their abilities and strengths as they grow up. (Introduction 1)

The Early Years Foundation Stage seeks to provide:

- **Quality and consistency** in all early years settings, so that every child makes good progress and no child gets left behind;

- **A secure foundation** through learning and development opportunities which are planned around the needs and interests of each individual child and are assessed and reviewed regularly;

- **Partnership working** between practitioners and with parents and/or carers;

- **Equality of opportunity** and anti-discriminatory practice, ensuring that every child is included and supported.

(Introduction – 3)

Overarching Principles

Four guiding principles should shape practice in early years settings. These are:

- Every child is a **unique child**, who is constantly learning and can be resilient, capable, confident and self-assured;

- Children learn to be strong and independent through **positive relationships**;

- Children learn and develop well in **enabling environments**, in which their experiences respond to their individual needs and there is a strong partnership between practitioners and parents and/or carers; and

- **Children develop and learn in different ways and at different rates**. The framework covers the education and care of all children in early years provision, including children with special educational needs and disabilities.

(Introduction – 6)

A quality learning experience for children requires a quality workforce. Well-qualified,

skilled staff strongly increases the potential of any individual setting to deliver the best possible outcomes for children. (EYFS 1:11)

Most children will develop and make progress that is typical for their age. Early years practitioners provide appropriate support through daily activities that promote and support children's development and learning. The Early Years Foundation Stage requires early years practitioners to identify the need for additional support as early as possible.

2. Special educational needs and disability code of practice: 0 - 25 years - 2014

Providers of early years education, that is all early years providers in the maintained, private, voluntary and independent sectors that a local authority funds, are required to have regard to this Code including the principles set out in Chapter 1. (5.2)

The Early Years Foundation Stage (EYFS) is the statutory framework for children aged 0 to 5 years. All early years providers **must** follow the safeguarding and welfare requirements of the EYFS and the learning and development requirements, unless an exemption from these has been granted. (5.3)

Providers **must** have arrangements in place to support children with SEN or disabilities. These arrangements should include a clear approach to identifying and responding to SEN. The benefits of early identification are widely recognised – identifying need at the earliest point, and then making effective provision, improves long-term outcomes for children. (5.4)

All those who work with young children should be alert to emerging difficulties and respond early. In particular, parents know their children best and it is important that all practitioners listen and understand when parents express concerns about their child's development. They should also listen to and address any concerns raised by children themselves. (5.5)

All early years providers are required to have arrangements in place to identify and support children with SEN or disabilities and to promote equality of opportunity for children in their care. These requirements are set out in the EYFS framework. The EYFS framework also requires practitioners to review children's progress and share a summary with parents. (5.12)

Where a child appears to be behind expected levels, or where a child's progress gives cause for concern practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, from practitioners observations and from any more detailed assessment of the child's needs. From within the setting practitioners should particularly consider information on a child's progress in communication and language, physical devel-

opment and personal, social and emotional development. Where any specialist advice has been sought from beyond the setting this should also inform decisions about whether or not a child has SEN. All information should be brought together with the observations of parents and considered with them. (5.28)

The SEN Code of Practice emphasises that some children and young people need educational provision that is additional to or different from this. This is special educational provision under Section 21 of the Children and Families Act 2014.

3. Early Support

The Special educational needs and disability code of practice advises that: Early Support information found at <http://www.ncb.org.uk/early-support> aids a better delivery and co-ordination of services for disabled children, and their families, including training for professional or trained independent volunteers providing a single point of contact or key working. (5.17)

Early Support is a way of working, underpinned by **10 principles** that aim to improve the delivery of services for disabled children, young people and their families. It enables services to coordinate their activity better and provide families with a single point of contact and continuity through key working. Early Support ensures that service delivery is child, young person and family centered. It focuses on enabling services and practitioners to work in partnership with children, young people and

their families.

www.councilfordisabledchildren.org.uk

4. Early Help Assessment (EHA)

'A delay in learning and development in the early years may or may not indicate that a child has SEN, that is, that they have a learning difficulty or disability that calls for special educational provision. Equally, difficult or withdrawn behaviour does not necessarily mean that a child has SEN. However, where there are concerns, there should be an assessment to determine whether there are any causal factors such as an underlying learning or communication difficulty. If it is thought housing, family or other domestic circumstances may be contributing to the presenting behaviour, a multi-agency approach, supported by the use of approaches such as the Early Help Assessment, should be adopted'. (5.29)

The Early Help Assessment (EHA) is a standardised approach to assessing children and young people's needs and deciding how they should be met. Central Bedfordshire Council states that *'the EHA is a key element of our strategy to delivering more effective early intervention and prevention and is a tool for the identification and initial assessment of children and young people considered to be in need of additional support'*.

Once completed the EHA will serve as a useful way to share information and to track and review a child or young person's progress. At the point an EHA is completed by a practitioner they are also encouraged to consider and identify any future likely or predictable difficulties a child may face.

The EHA form should be used by practitioners in all agencies who work with unborn babies, babies, children, young people and their families and have been trained in its use. www.centralbedfordshire.gov.uk/learning/schools/support-for-professionals/Common-assessment-framework.aspx

5. Medical Conditions

All early years providers should take steps to ensure that children with medical conditions get the support required to meet those needs. This is set out in the EYFS framework. (5.11)

A medical diagnosis or a disability does not necessarily imply SEND. It may not be necessary for a child or young person with any particular diagnosis or medical condition to need any form of additional educational provision at any phase of education. It is the child's **educational needs** rather than a medical diagnosis that must be considered. Some children may not require school based SEND provision or EHC plans but may have medical conditions that, if not properly managed, could hinder their access to education.

6. Partnership with Parents

The Special educational needs and disability code of practice recognises that 'Parents' early observations of their child are crucial... (5.14) and that 'Where a setting identifies a child as having SEN they **must** work in partnership with parents to establish the support the child needs.(5.37)

Part 3 of the Children and Families Act 2014, local authorities **must** have regard to the importance of providing children and their par-

ents and young people with the information and support necessary to participate in decisions. (2.1)

The Central Bedfordshire Local Offer website www.centralbedfordshire.gov.uk/learning/local-offer/default.aspx provides links to a range of services designed to inform and support children, young people and families in making choices and decisions regarding their individual needs.

NB: Parents should be taken to include all those with parental responsibility including carers and corporate parents, where not specifically stated.

The Structure of the Guidance

This guidance is divided into the four broad areas of need as described in the SEND code of practice.

- Communication and interaction
- Cognition and learning
- Social, emotional and mental health difficulties
- Sensory and/ or physical needs

The code of practice also advises early years practitioners to be aware that a child may have difficulties in more than one of the areas of need and that a child's needs may change over time.

Early years providers should assess children's progress in accordance with the seven areas of development and learning set out on the EYFS. Early Years practitioners will be famil-

iar with the Early Years Outcomes document which is a non statutory guide to help and inform understanding of children's development. It is widely used as a guide to making best fit judgements about whether a child is showing typical development for their age. These outcomes together with professionals' advice have been used as descriptors to indicate the level of SEND support will be appropriate to meet the needs of the child.

Settings should provide a **graduated approach** to assessing and reviewing children's SEN. Children who require a SEND support require action that is **additional to** or **different from** the usual range of differentiated activities within the setting. Some children may also require targeted interventions and specialist equipment. The effectiveness of these should be reviewed regularly with parents, practitioners and other professionals to plan the next steps..

To enable schools and settings to record the actions and steps taken to provide SEND support for individual children Central Bedfordshire have produced a SEND Support Plan – One planning for Education, Health and Care.

Courses of action within a graduated approach can be described as follows:-

Stage One

- *Some additional or different action within the setting will be needed to support the child's learning and development.*

Stage Two

- *This builds on the above but settings will be consulting outside agencies to support their own interventions*

Education, Health and Care Plan (EHC Plan)

- *This is only appropriate for children with very significant long term educational needs. The SEND of the great majority of children should be met effectively at Stage One and Stage Two without the support of an EHC plan.*

For each **area of need** there are:

- Indicators relating to **children's characteristics** at Stage 1 / Stage 2 and an additional level of indicators which might trigger a request for a needs assessment for an EHC plan.
- Indicators relating to the **provision characteristics** – that is the actions that settings should be taking at Stage 1 and Stage 2.

Deciding on a Child's Level of Need

The SEND Code of Practice 2014 advises that:

In addition to the formal checks, early years practitioners working with children should monitor and review the progress and development of all children throughout the early years. (5.27)

Where a child appears to be behind expected levels, or where a child's progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, from practitioner observations and from any more detailed assessment of the child's needs. From within the setting practitioners should particularly consider information on a child's progress in communication and language, physical development and personal, social and emotional development. Where any specialist advice has been sought from beyond the setting, this should also inform decisions about whether or not a child has SEN. All the information should be brought together with the observations of parents and considered with them. (5.28)

Children's Characteristics

When deciding on a child's primary area of need, a good starting point are the descriptors within the area of need - 'Cognition and Learning'. Based on how these match a child's needs, the other sections of the Guidance should then be consulted.

The descriptors of **children's characteristics** should be read with the following in mind:

- Age of the child and stage of development plus experience;
- How recently he or she started at the setting;
- The behaviour and skills of the majority of his/her peers;
- Family background/history.

However, this should not preclude the possibility of a young child who has recently joined a setting being identified with additional needs that require immediate support at whatever level is appropriate.

When reading the descriptors it should be borne in mind that children may show some or all of the difficulties stated at each level of need. Difficulties at each level of need are expected to be in addition to those at a less severe level.

Provision characteristics

Where a setting makes special educational provision for a child with SEN they should inform the parents and a maintained nursery school must inform the parents. All settings should adopt a graduated approach with four stages of action: **assess, plan, do and review**. (5.38)

Decisions about a child's level of need should be part of a continuous and systematic cycle of **Assess, Plan, Do, and Review** within the setting, to help all children to develop, learn and progress. The range, type and intensity of interventions should not be seen as a fixed state but should be changed according to the progress the child makes over time.

Assess

In identifying a child as needing SEN support, the early years practitioner, working with the setting SENCo and the child's parents, will have carried out an analysis of the child's needs. This initial assessment should be reviewed regularly to ensure that support is

Is matched to need. Where there is little or no improvement in the child's progress, more specialist assessment may be called for from specialist teachers or from health, social services or other agencies beyond the setting. Where professionals are not already working with the setting, the SENCo should contact them, with the parents agreement. (5.39)

Plan

Where it is decided to provide SEN support, and having formally notified the parents (see 5.38) the practitioner and the SENCo should agree, in consultation with the parent, the outcomes they are seeking, the interventions and support to be put in place, the expected impact on progress, development or behaviour, and a clear date for review. Plans should take into account the views of the child. The support and intervention provided should be selected to meet the outcomes identified for the child, based on reliable evidence of effectiveness, and provided by practitioners with relevant skills and knowledge. Any related staff development needs should be identified and addressed. (5.40). Parents should be involved in planning support and, where appropriate, in reinforcing the provision in reinforcing the provision or contributing to progress at home. (5.41)

Do

The early years practitioner, usually the child's key person, remains responsible for working with the child on a daily basis. With support from the SENCo, they should oversee the implementation of the interventions or programmes agreed as part of SEN support. The SENCo should support the practitioner in as-

sessing the child's response to the action taken, in problem solving and advising on the effective implementation of support. (5.42)

Review

The effectiveness of the support and its impact on the child's progress should be reviewed in line with the agreed date. The impact and quality of the support should be evaluated by the practitioner and the SENCo working with the child's parents and taking into account the child's views. They should agree any changes to the outcomes and support for the child in light of the child's progress and development. Parents should have clear information about the impact of the support provided and be involved in planning next steps. (5.43)

This cycle of action should be revisited in increasing detail and with increasing frequency, to identify the best way of securing good progress. At each stage parents should be engaged with the setting, contributing their insights to assessment and planning. Intended outcomes should be shared with parents and reviewed with them, along with action taken by the setting, at agreed times. (5.44)

Where a child has an EHC plan, the local authority must review that plan as a minimum every twelve months. As part of the review, the local authority can ask settings, and require maintained nursery schools, to convene and hold the annual review meeting on its behalf. Further information about EHC plan reviews and the role of early years settings is in Chapter 9, Education, Health and Care needs assessments and plans. (5.46)

At **Stage 1** some additional or different action within the setting will be required to enable the child to access independent learning and the curriculum.

Stage 2 builds on the arrangements for Stage 1 to enable settings to match provision to meet children's needs. At this point settings should be consulting outside agencies to support their own interventions with children. Settings must seek parents' written consent before consulting any outside agency and tell them in advance when a professional is visiting the setting. They must always share with parents/carers reports produced by professionals. In many instances the professionals will themselves meet with parents/carers.

Stage 1 and Stage 2 **provision characteristics** are described under the following **strands of action**:-

- Assess, plan, do and review
- Grouping for teaching purposes
- Curriculum and teaching methods
- Additional human and other resources
- Parent/carers and child's participation
- Training and Advice

Additional funding for children with SEN

Maintained nursery schools and nursery classes:

All Nursery schools and Lower schools receive as part of their overall budget, funding to

meet the needs of children who have SEN at Stage 1 and 2. The amount of additional support that each child requires will depend on their level of need, but in all cases, schools should be able to identify how they are meeting the needs of individuals in line with the SEN Code of Practice from their existing budget.

Children at Stage 2 will require higher levels of support than children at Stage 1. On average a school's SEN budget should be able to provide SEND support for a child at Stage 2.

Currently, schools are eligible to receive Additional SEN funding from the Local Authority when all of the following three criteria are met:

1. The child's developmental needs can best be described by the descriptors that indicate a request to the local authority for an EHCP
 2. They are able to demonstrate that a child requires a higher level of support than they are able to provide for each session and;
 3. The child's chronological age places them in Nursery years 1 or 2.
- Where children meet the above three criteria match funding for one hour per session will be provided up to a maximum of 5 sessions.

Private Voluntary and Independent (PVI) providers— Early Years Stage 2

Children aged 3—5 years:

Settings with a child who meets the indicators for SEND support at Stage 2 are eligible to apply for funding to assist in employing a member of staff for 1 hour per morning or af-

ternoon session that the child attends (up to a maximum of 5 hours). Funding is for a maximum of one term initially. Exceptional needs funding is available for a small percentage of children whose needs are more severe and complex. Children requiring this level of support may be in one of the two following categories:

1. Children who have very significant needs (severe, complex, life-long), and would be unable to access the setting without one to one support.
 2. Children who demonstrate extreme/unpredictable behaviour which is a danger to themselves and others who therefore require constant supervision.
- Settings with a child meeting the above indicators are eligible to apply for funding to employ a member of staff to cover the morning or afternoon session the child attends (up to a maximum of 5 hours). Funding is for a maximum of one term initially.

Children under 3 years:

Settings with children under 3 years who meet the above indicators are eligible to apply for funding through their Childcare Development Officer.

Requesting an Education, Health and Care Plan

The special educational needs of the great majority of children should be met effectively within mainstream settings at Stage 1 or Stage 2 without the Local Authority needing to make an EHCP. The EHCP is appropriate only for chil-

dren with long term needs associated with major difficulties in one or more of the four areas of need. In these cases, the severity of the child's special educational needs indicates a need for the Local Authority to take responsibility and to become more actively involved. In such instances there will be a detailed SEND Support plan which has recorded the child and family involvement, a graduated approach to next steps, evidence based interventions tried and extensive multi-agency involvement.

It is expected that when a request for an EHCP is made, the child will have had SEND support at a high level over time. This would equate to a minimum of one hour of individual support for each funded session attended as described in the section **Funding for Children with SEN.**

The evidence provided to support a Needs Assessment Request for an EHC Plan should show clearly how additional support at Stage 2 has been targeted. It should show either that:

- The child is failing to make adequate progress (as defined above) despite appropriate intervention at Stage 2; or
- That there will be a need to sustain a high level of support over time to ensure the child continues to make adequate progress.

It should also provide clear evidence from the setting and from appropriate services and support professionals that the child's characteristics, are now such that an EHCP would be appropriate. For example, in the case of a child with speech and language difficulties, advice should

be submitted from the Speech and Language Therapy service in addition to the Psychology and Advisory Support Team or Early Years Support Team.

As stated in the SEN Code of Practice, in a very few exceptional cases of young children where there are severe and complex needs, the extent of the needs will be evident.

In such exceptional cases requests for an EHCP might be made prior to any intervention by a setting at Stage 1 or Stage 2. It is likely that such children will have a significant disability and have been supported by a multi disciplinary team. Examples may include children with profound sensory impairment or those with significant physical or learning disability.

The child's Send Support Plan together with up to date reports from the key professionals working with the child should be submitted with a Needs Assessment Request. Please refer to the Needs Assessment Pathway document for further guidance

COGNITION AND LEARNING

Introduction:

The SEN Disability Code of Practice 0-25

'In assessing progress of children in the early years, practitioners can use the non-statutory Early Years Outcomes guidance as a tool to assess the extent to which a young child is developing at expected levels for their age. The guidance sets out what most children do at each stage of their learning and development. These include typical behaviours across the seven areas of learning' (5.21.)

'Where a child appears to be behind expected levels, or where a child's progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, from practitioner observations and from any more detailed assessment of the child's needs. From within the setting practitioners should particularly consider information on a child's progress in communication and language, physical development and personal, social and emotional development.

Where any specialist advice has been sought from beyond the setting, this should also inform decisions about whether or not a child has SEN. All the information should be brought together with the observations of parents and considered with them' (5.28.)

Statutory Framework for the Early Years Foundation Stage 2014

Practitioners must consider the individual needs,

interests, and stage of development of each child in their care, and must use this information to plan a challenging and enjoyable experience for each child in all of the areas of learning and development. Practitioners working with the youngest children are expected to focus strongly on the three prime areas, which are the basis for successful learning in the other four specific areas. The three prime areas reflect the key skills and capacities all children need to develop and learn effectively, and become ready for school.

It is expected that the balance will shift towards a more equal focus on all areas of learning as children grow in confidence and ability within the three prime areas. But throughout the early years, if a child's progress in any prime area gives cause for concern, practitioners must discuss this with the child's parents and/or carers and agree how to support the child. Practitioners must consider whether a child may have a special educational need or disability which requires specialist support. They should link with, and help families to access, relevant services from other agencies as appropriate' (1.6.)

This guidance uses the Early Years Outcomes as the descriptors to help practitioners decide where the child's knowledge and skills are and the level of SEND Support that should be in place. In partnership with parents and carers, practitioners should plan interventions and strategies which are appropriate to the age and stage of the development of the child whilst having the highest expectations for the child's learning and development.

Cognition and Learning Provision Characteristics

Stage One

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in setting targets for SEND Support Plan, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of child are taken account of.
- Opportunities for parents/carers to learn how to help their child further.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, at lunchtime.
- Planning of intervention involving the parent/carer, child, setting, SEN-Co, key person.
- SEND Support in place with SMART targets.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.

Stage Two

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in setting targets for SEND Support Plan, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of child are taken account of.
- Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence.
- Enhanced contact for parents/carers with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning and intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies.
- SEND Support Plan in place with reviewed and planned SMART targets, which take accounts of specialist advice.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.
- Input or attendance made by appropriate external agencies to reviews.

Cognition and Learning Provision Characteristics

Stage One

Quality learning experiences

- Strategies used flexibly to enhance play and learning activities and to focus available adult support where needed.
- Differentiation in planned activities where appropriate.
- Additional adult attention and/or support for 1:1 and group activities where relevant.

Additional human and other resources

- Additional adult attention and/or support for some activities, including SEND Support Plan targets, from practitioners already working in the setting.
- Supervision and monitoring of SEND Support Plan by SENCo.

Stage Two

Quality learning experiences

- Strategies used flexibly to enhance play and learning activities and to focus available adult support where needed.
- Differentiation to a wide range of planned activities.
- Additional adult attention and/or support for group activities.
- Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on individual targets.

Additional human and other resources

- Additional adult attention and/or support for some activities, including SEND Support/One Plan targets.
- Supervision and monitoring of SEND Support Plan by SENCo.
- Time allocated for key professionals to liaise with external agencies.
- Access to ICT and specialist equipment/materials (e.g. scissors, sloping boards, pencil grips), if appropriate.
- Space for ICT, individual work, and storage facilities for child's specific equipment.

Cognition and Learning Provision Characteristics

Stage One

Stage Two

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources, and on differentiation for access to activities.
- Account taken of the characteristics of the child's learning: play and exploration, active learning and creative and critical thinking and respond with strategies and interventions to strengthen success with SEND Support Plan targets.

Training and advice

- Staff training needs are addressed.
- New information passed to other staff and parents as appropriate.
- One-off advice may be sought from the Psychology & Advisory Support Team or Early Years Support Team to inform planning.
- Regular moderation by the setting staff group of the Early Years Outcomes.
- Setting SENCo attends SEN Professional Study Groups.
- Staff attend regular network meeting.

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources, with increased differentiation of planned play and learning activities, to reflect child's developmental and language levels, with key learning outcomes identified in SEND Support Plan.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified through involvement of external agencies.

Training and advice

- Staff training needs are addressed.
- New information passed to other staff and parents as appropriate.
- Advice is sought on an ongoing basis from the Psychology & Advisory Support Team and informs planning.
- Regular moderation by the setting staff group of the Early Years Outcomes.
- Setting SENCo attends SEN Professional Study Groups.
- Staff attend regular network meeting.
- Practitioners knowledgeable about voluntary agencies / support groups who can give advice/support to parents/carers.

Cognition and Learning Descriptors Foundation Stage Children's Characteristics 2 – 3 years			
Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	Child meets criteria for request for an Education, Health and Care Plan Birth – 11 months band
<u>Communication and Language</u> Listening and attention	<ul style="list-style-type: none"> • Listens to and enjoys rhythmic patterns in rhymes and stories. • Enjoys rhymes and demonstrates listening by trying to join in with actions or vocalisations. • Rigid attention – may appear not to hear. 	<ul style="list-style-type: none"> • Moves whole bodies to sounds they enjoy, such as music or a regular beat. • Has a strong exploratory impulse. • Concentrates intently on an object or activity of own choosing for short periods. • Pays attention to dominant stimulus – easily distracted by noises or other people talking. 	<ul style="list-style-type: none"> • Turns towards a familiar sound then locates range of sounds with accuracy. • Listens to, distinguishes and responds to intonations and sounds of voices. • Reacts in interaction with others by smiling, looking and moving. • Quietens or alerts to the sound of speech. • Looks intently at a person talking, but stops responding if speaker turns away. • Listens to familiar sounds, words or finger plays. • Fleeting Attention – not under child's control, new stimuli takes whole new attention.

<u>Understanding the World</u> People and communities	<ul style="list-style-type: none"> Has a sense of own immediate family and relations. In pretend play, imitates everyday actions and events from own family and cultural background, e.g. making and drinking tea. Beginning to have their own friends. Learns that they have similarities and differences that connect them to, and distinguish them from, others. 	<ul style="list-style-type: none"> Is curious about people and shows interest in stories about themselves and their family. Enjoys pictures and stories about themselves, their families and other people. 	<p>T</p> <ul style="list-style-type: none"> The beginnings of understanding of people and communities lie in early attachment and other relationships.
The world	<ul style="list-style-type: none"> Enjoys playing with small-world models such as a farm, garage, or a train track. Notices detailed features of objects in their environment. Sometimes tries to self-correct without adult prompting, (e.g. when attempting to fit inset or interlocking jigsaw pieces). Can imitate and show they have remembered actions demonstrated by more skilled child or adult with adult prompt or support. 	<ul style="list-style-type: none"> Explores objects by linking together different approaches: shaking, hitting, looking, feeling, tasting, mouthing, pulling, turning and poking. Remembers where objects belong. Matches parts of objects that fit together, e.g. puts lid on teapot. Rarely self-corrects without adult prompting, (e.g. when attempting to fit inset jigsaw pieces). Sometimes imitates and shows they have remembered actions demonstrated by more skilled child or adult in a familiar routine or context. 	<ul style="list-style-type: none"> Closely observes what animals, people and vehicles do. Watches toy being hidden and tries to find it. Looks for dropped objects. Becomes absorbed in combining objects, e.g. banging two objects or placing objects into containers. Knows things are used in different ways, e.g. a ball for rolling or throwing, a toy car for pushing. Makes no attempts to self-correct, e.g. when attempting to fit inset jigsaw pieces. Needs adult to draw attention to problem and guide solution.

Cognition and Learning Descriptors Foundation Stage Children's Characteristics 3 – 4 years

The world			<ul style="list-style-type: none"> Shows very little or no spontaneous imitation and evidence of remembering actions demonstrated by more skilled child or adult. Needs modelling, support, and practice to learn new actions/skills.
<u>Technology</u>	<ul style="list-style-type: none"> Seeks to acquire basic skills in turning on and operating equipment. Operates mechanical toys, e.g. turns the knob on a wind-up toy or pulls back on a friction car. 	<ul style="list-style-type: none"> Anticipates repeated sounds, sights and actions, e.g. when an adult demonstrates an action toy several times. Shows interest in toys with buttons, flaps and simple mechanisms and beginning to learn to operate them. 	<ul style="list-style-type: none"> The beginnings of understanding technology lie in babies exploring and making sense of objects and how they behave.
<u>Expressive Arts and Design</u> Exploring and using media and materials	<ul style="list-style-type: none"> Joins in singing favourite songs. Creates sounds by banging, shaking, tapping or blowing Shows an interest in the way musical instruments sound. Experiments with blocks, colours and marks. 	<ul style="list-style-type: none"> Imitates and improvises actions they have observed, e.g. clapping or waving. Begins to move to music, listen to or join in rhymes or songs. Notices and is interested in the effects of making movements which leave marks. 	<ul style="list-style-type: none"> Explores and experiments with a range of media through sensory exploration, and using whole body. Move their whole bodies to sounds they enjoy, such as music or a regular beat.

Being imaginative	<ul style="list-style-type: none"> Beginning to use representation to communicate, e.g. drawing a line and saying 'That's me'. Beginning to make-believe by pretending. Pretend play sometimes shows representation and beginnings of role play, but the child doesn't typically develop or extend the play spontaneously and involve others (e.g. they use one object to represent another, especially when objects have characteristics in common, such as a brick as a car; a block on a plate as a cake; a banana as a telephone). They may use other people's belongings in pretend play, (e.g. Mum's bag and brush). May pretend play with small world toys. 	<ul style="list-style-type: none"> Expresses self through physical action and sound Pretend play is limited to simple pretend with some elements of representation, (e.g. brushing dolls hair, pretending to be asleep (covers self with a blanket and closes eyes). Pretends that one object represents another, especially when objects have characteristics in common. 	<ul style="list-style-type: none"> Pretend play lacks representation and is limited to showing understanding of functional use of real objects in relation to self, (e.g. using a hairbrush, drinking from a cup).

<p><u>Expressive Arts and Design</u></p> <p>Being imaginative</p>	<ul style="list-style-type: none"> • Developing preferences for forms of expression. • Uses movement to express feelings. • Creates movement in response to music. • Sings to self and makes up simple songs. • Makes up rhythms. • Notices what adults do, imitating what is observed and then doing it spontaneously when the adult is not there. • Engages in imaginative role play based on own first hand experiences. • Builds stories around toys, e.g. farm animals needing rescue from an armchair 'cliff' • Uses available resources to create props to support role play. • Captures experiences and responses with a range of media, such as music, dance and paint and other materials or words. 	<ul style="list-style-type: none"> • Beginning to use representation to communicate, e.g. drawing a line and saying 'That's me'. • Beginning to make-believe by pretending. Pretend play sometimes shows representation and beginnings of role play, but the child doesn't typically develop or extend the play spontaneously and involve others (e.g. they use one object to represent another, especially when objects have characteristics in common, such as a brick as a car; a block on a plate as a cake; a banana as a telephone). They may use other people's belongings in pretend play, (e.g. Mum's bag and brush). May pretend play with small world toys. 	<ul style="list-style-type: none"> • Expresses self through physical action and sound. • Pretends that one object represents another, especially when objects have characteristics in common. • Pretend play is limited to simple pretend with some elements of representation, (e.g. brushing doll's hair, pretending to be asleep (covers self with a blanket and closes eyes).

Communication and Interaction

Introduction:

The SEN Disability Code of Practice 0-25

Identifying and assessing SEN for young children who's first language is not English requires particular care. Early years practitioners should look carefully at all aspects of a child's learning and development to establish whether any delay is related to learning English as an additional language or if it arises from SEN or disability. Difficulties related solely to learning English as an additional language are not SEN (5.30)

Children and young people with speech, language and communication needs (SLCN) have difficulty in communication with others. This may be because they have difficulty saying what they want to, understanding what is being said to them or they do not understand or use social rules of communication. The profile for every child with SLCN is different and their needs may change over time. They may have difficulty with one, some or all of the different aspects of speech, language or social communication at different times of their lives. (6.28)

Children and young people with an Autistic Spectrum Disorder, including Asperger's Syndrome and Autism, are likely to have particular difficulties with social interaction. They may also experience difficulties with language, communication, social interaction and imagination, which can impact on how they relate to others. (6.29) **Statutory Framework for the Early Years Foundation Stage**

Communication and language development involves giving children opportunities to experience a rich language environment; to develop their confidence and skills in expressing themselves; and to speak and listen in a range of situations. (1.6)

If a child does not have a strong grasp of English language, practitioners must explore the child's skills in the home language with parents and/or

carer, to establish whether there is a cause for concern about language delay. (1.8)

Speech, language and communication

For the majority of children, communication skills develop naturally over the course of the Early Years Foundation Stage, and development of the speech sound system is typically not complete until 6 or 7 years of age. Communication and language skills in general will continue to develop throughout life. Communication and interaction difficulties cover a wide and complex range of needs that frequently overlap. These include:-

Developmental language delay

Children may have a delay in one or more aspect of language (understanding, expression, interaction) but progress, however slow, follows a typical pattern of development. ***Developmental language disorder***

- Children may show an uneven or unusual pattern in one or more aspects of language (understanding, expression, interaction).

Phonological/speech difficulty

- Children may have difficulty producing intelligible speech.

Receptive language difficulty

Children may have particular difficulty attaching meaning to words and developing concepts or have difficulties understanding complex grammar or implied meaning.

Communication and Interaction

Speech Language and Communication Needs

For the majority of children, communication skills develop naturally over the course of the Foundation Stage and the development of the speech sound system is typically not complete until 6 or 7 years of age. Communication and language skills in general will continue to develop throughout life.

The Practice Guidance for the Early Years Foundation Stage reminds us that babies and children “learn to talk by being talked to”. It outlines how positive relationships and enabling environments contribute to this development, and how learning and development can be supported.

Communication and interaction difficulties cover a wide and complex range of needs that frequently overlap. These include:

- **Developmental language delay**
Children may have a delay in one or more aspect of language (understanding, expression, interaction) but progress, however slow, follows a typical pattern of development.
- **Developmental language disorder**
Children may show an uneven or unusual pattern in one or more aspects of language (understanding, expression, interaction).
- **Phonological/ speech difficulty**
Children may have difficulty producing intelligible speech.

- **Receptive language difficulty**
Children may have particular difficulty attaching meaning to words and developing concepts or have difficulties understanding complex grammar or implied meaning.
- **Expressive language difficulty**
Children may have difficulty accessing vocabulary, using complex grammar, organising ideas, structuring sentences and conveying intended meaning.

Speech, Language and Communication Provision Characteristics

Stage One

Parents/carers' and child's participation

- Parents/carers will contribute to the assessment.
- Parents/carers will participate in SEND Support Plan setting outcomes for progress, agreeing strategies and interventions, monitoring progress and reviews.
- Parents/carers to participate in using strategies and interventions for progress to support their child at home.
- The views of the child are taken account of.
- Parents/carers are aware of opportunities to learn how to help their child further e.g. useful websites.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do, review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, at lunchtime.
- Planning of intervention involving the parent/carer, child, setting, SENCo, key person.
- SEND Support Plan in place with SMART targets.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.

Stage Two

Parents/carers' and child's participation

- Parents/carers will contribute to the assessment.
- Parents/carers will participate in SEND Support Plan setting outcomes, monitoring progress and reviews.
- Parents/carers will be involved in using strategies and interventions for progress to support their child at home.
- The views of the child are taken account of.
- Parents/carers have opportunities to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's speech and language skills.
- Enhanced contact for parents with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do, review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning and intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies.
- SEND Support Plan in place with reviewed and planned SMART targets, which take accounts of specialist advice.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.
- Input or attendance made by appropriate external agencies to reviews.

Speech, Language and Communication Provision Characteristics

Stage One

Stage Two

Additional human and other resources

- All adults are aware of child's language needs, and give consideration to modifying the language they use with the child, and/or how to facilitate the child's use of language.
- Additional adult attention and/or support for some activities, including, verbal exchanges and play with other children, from practitioners already working in the setting.
- Supervision and monitoring of the child's progress towards the Early Years Foundation Stage Early Learning Goals by key person and setting SENCo.

Quality Learning Experiences

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources. Differentiation for play and learning activities. Possibly some specific reinforcement or skill-development activities to support targeted progress.
- Adaptation of content and presentation of language-based activities and materials at group times e.g. story, singing times by:
- Ensuring the child is appropriately placed.
- Checking that the child is giving attention by saying their name.
- Repeating instructions individually to child.
- Simplifying and/or reducing amount of language used.

Additional human and other resources

- All adults are aware of child's language needs, and give consideration to modifying the language they use with the child, and/or how to facilitate the child's use of language in verbal exchanges and play with other children.
- Additional adult attention and/or support for a significant number of activities.
- Supervision and monitoring of SEND Support Plan by the setting SENCo.
- Time allocated for key professionals to liaise with external agencies.
- Access to ICT and specialist equipment/materials if appropriate.

Quality Learning Experiences

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources. Increased differentiation of access to learning and play activities and materials to reflect the child's developmental and language levels. Key learning outcomes are identified in SEND Support Plan.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified through involvement of external agencies.
- Thought is given to how all adults are modelling language, and supporting the child's understanding and use of language across the range of learning and play activities.
- 1:1 or small group activities.

Speech, Language and Communication Provision Characteristics

Stage One

Stage Two

Training and Advice

- Staff Training needs are addressed, and information passed to other staff and parents as appropriate.
- Information, advice posters and leaflets about speech and language development are displayed in the setting.
- One-off advice may be sought from the Psychology & Advisory Support Team and informs planning.
- Practitioners familiar with the Inclusion Development Programme Supporting children with speech, language and communication needs: Guidance for practitioners in the Early Years Foundation Stage (2008).
- Practitioners and regular Communication Network Meetings.

Quality Learning Experiences

- Modelling and supporting the child's communication and language.
- Varying pace of delivery.
- Giving the child time to respond to comments and questions.
- Using Visual cues.
- Supporting the child to focus and listen.
- Providing opportunities to repeat/practice speech.

Training and Advice

- Staff training needs are addresses (e.g. in use of augmented forms of communication, such as Makaton signing), and information passed to other staff and parents.
- Advice sought on an ongoing basis from the Psychology & Advisory Support Team and informs planning.
- Consultation with or individual referral to external agencies, including the NHS Speech and Language Therapy Service and/or the Central Bedfordshire Early years Speech and Language Team.
- Practitioners knowledgeable about voluntary agencies/support groups/ websites where parents/carers can seek advice and support.

Communication and Interaction

Social Communication and Autistic Spectrum Disorder

Children/young people with a Social Communication Disorder have persistent difficulties in the social use of verbal and non-verbal communication. Typical pupil characteristics of this disorder are described under 'Area of Need' headings; *Interaction* and *Relationships* and *Language and Communication*. Children/young people diagnosed with an Autistic Spectrum Disorder will also demonstrate challenges in these two areas, but can be differentiated by the additional presence of pupil characteristic described under the 'Area of need' heading: *Inflexibility in Thinking and behaviour*. They may also experience difficulties in *Sensory processing*.

The combined challenges experienced by children/young people with Social Communication and Autistic Spectrum Disorders may impact on their *Personal, Emotional development and well-being*.

Social Communication and Autistic Spectrum Disorders are medical diagnosis based on Neurodevelopment Disorders, resulting in developmental differences in each of the relevant areas of need.

Other factors that affect the individual; presentation may include:

- Characteristics occurring with differing degrees of severity or an uneven profile.
- Possibility of changes occurring with increasing age and/or difficulties may become more apparent at times of increasing demand.
- The possible existence of associated needs, for example; learning difficulties, coordination and motor function difficulties or epilepsy.
- Education, social environment and personality.

All settings should be familiar with the Inclusion Development Programme Supporting Children on the Autistic Spectrum Guidance for practitioners in the Early Years (2009).

Social, Emotional and Mental Health

Introduction:

The SEN & Disability Code of Practice 2014

A delay in learning and development in the early years may or may not indicate that a child has SEN that is that they have a learning difficulty or disability that calls for special educational provision. Equally difficult or withdrawn behaviour does not necessarily mean that a child has SEN. However, where there are concerns, there should be an assessment to determine whether there are any causal factors such as an underlying learning or communication difficulty. If it is thought housing, family or other domestic circumstances may be contributing to the presenting behaviour, a multiagency approach, supported by the use of approaches such as the Early Help Assessment, should be adopted. (5.29)

Statutory Framework for the Early Years Foundation Stage 2014:

Personal, Social and Emotional Development (PSED) is one of the three primary areas of development in the framework for the early years. The Early Years Outcomes for PSED provide the descriptors for assessment. However, all seven areas are interconnected and assessment across the areas should be

taken into account when assessing and planning for progress.

A delay in development in language and communication or cognition and learning may cause a child to present as either withdrawn or over enthusiastic.

Children new to the setting or in a stage of transition and a change of key person may take time to settle and feel secure. Settings should take this into account giving children time to become familiar with new routines and expectations.

A strong partnership with parents/carers is key to planning and reviewing successful outcomes for children.

Settings should take a holistic view when a child presents with unusual patterns of behaviour. Children's responses to changes in their circumstance, e.g. the arrival of a new baby or if a member of staff leaves can be quite common. However, practitioners should be aware that sudden changes in a child's behaviour could be indicative of issues requiring a response under the guidelines for 'Safeguarding and Welfare Requirements'

Social, Emotional and Mental Health Provision Characteristics

Stage One

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in setting targets for SEND Support Plan, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of child are taken account of.
- Opportunities for parents/carers to discuss how to help their child further including a range of outside agencies.
- Parents/carers are informed about Early Help Assessment (EHA), the Local Offer and Parent Partnership Service.

Assess, plan, do review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, at lunchtime.
- Planning of intervention involving the parent/carer, child, setting, SEN-Co, key person.
- SEND Support in place with SMART targets.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.

Stage Two

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in setting targets for SEND Support Plan, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of child are taken account of.
- Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence.
- Enhanced contact for parents/carers with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about Early Help Assessment (EHA), the Local Offer and Parent Partnership Service.

Assess, plan, do review

- Assessment, planning and review may need to take account of the child's attendance at more than one setting:
- Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning and intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies.
- SEND Support Plan in place with reviewed and planned SMART targets, which take accounts of specialist advice.
- Half-termly (approximately 6-weekly) review of child's progress towards targets.
- Input or attendance made by appropriate external agencies to reviews.

Social, Emotional and Mental Health Provision Characteristics

Stage One

Stage Two

Quality learning experiences

- Strategies used flexibly to enhance play and learning activities and to focus available adult support where needed.
- Differentiation in planned activities where appropriate.
- Additional attention from key person and/or support for 1:1 and group activities where relevant.

Additional human and other resources

- Additional time for child's key person for support in some activities, including SEND Support Plan targets.
- Time allocated for key person to liaise with parent/carers
- Supervision and monitoring of SEND Support Plan by SENCo.

Quality learning experiences

- Strategies used flexibly to enhance play and learning activities and to focus available adult support where needed.
- Differentiation to a wide range of planned activities.
- Additional attention from key person and/or support for group activities.
- Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on individual targets.

Additional human and other resources

- Additional time for child's key person to spend a significant amount of time in setting to achieve SEND Support Plan targets.
- Supervision and monitoring of SEND Support Plan by SENCo.
- Time allocated for key professionals to liaise with parent/carers

Social, Emotional and Mental Health Provision Characteristics

Stage One	Stage Two
<p>Early Years Foundation Stage – supporting development and learning</p> <ul style="list-style-type: none"> Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them. Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources, and on differentiation for access to activities. Account taken of the characteristics of the child's learning: play and exploration, active learning and creative and critical thinking and respond with strategies and interventions to strengthen success with SEND Support Plan targets. <p>Training and advice</p> <ul style="list-style-type: none"> Staff training needs are addressed; staff are aware of the emotional needs of babies and young children, their need for good attachments to their key person and strategies for helping children to manage their own social and emotional development. Knowledge of key working approaches for working in partnership with parents/carers. New information passed to other staff and parents as appropriate. One-off advice may be sought from the Psychology & Advisory Support Team or Early Years Support Team to inform planning. Practitioners knowledgeable about Early Help Assessment, voluntary agencies and support groups who can give advice/support to parents/carers. 	<p>Early Years Foundation Stage – supporting development and learning</p> <ul style="list-style-type: none"> Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them. Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources, with increased differentiation of planned play and learning activities, to reflect child's developmental and language levels, with key learning outcomes identified in SEND Support Plan. Increased focus on specific activities as identified in the SEND Support Plan. <p>Training and advice</p> <ul style="list-style-type: none"> Staff training needs are addressed; staff are aware of the emotional needs of babies and young children, their need for good attachments to their key person and strategies for helping children to manage their own social and emotional development. Social, Emotional and Mental Health Descriptors Foundation Stage Children's Characteristics 2 – 3 years			
Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	Child meets criteria for request for an Education, Health and Care Plan Birth – 11 months band
<u>Personal Social and Emotional Development</u> Self confidence and self awareness	<ul style="list-style-type: none"> • Explores new toys and environments, but 'checks in' regularly with familiar adult as and when needed. • Gradually able to engage in pretend play with toys (supports child to understand their own thinking may be different from others). • Demonstrates sense of self as an individual, e.g. wants to do things independently, says 'No' to adult. • Limited awareness of own limitations or possible dangers in the environment, which may compromise the safety of themselves or others when playing independently. 	<ul style="list-style-type: none"> • Enjoys finding own nose, eyes or tummy as part of naming games. • Learns that own voice and actions have effects on others. • Uses pointing with eye gaze to make requests, and to share an interest. • Engages other person to help achieve a goal, e.g. to get an object out of reach. 	<ul style="list-style-type: none"> • Laughs and gurgles, e.g. shows pleasure at being tickled and other physical interactions. • Uses voice, gesture, eye contact and facial expression to make contact with people and keep their attention.
Managing feelings and behaviour	<ul style="list-style-type: none"> • Is aware of others' feelings, for example, looks concerned if hears crying or looks excited if hears a familiar happy voice. • Growing sense of will and determination may result in feelings of anger and frustration which are difficult to handle, e.g. may have tantrums. • Responds to a few appropriate boundaries, with encouragement and support. • Begins to learn that some things are theirs, some things are shared, and some things belong to other people. 	<ul style="list-style-type: none"> • Uses familiar adult to share feelings such as excitement or pleasure, and for 'emotional refuelling' when feeling tired, stressed or frustrated. • Growing ability to soothe themselves, and may like to use a comfort object. • Cooperates with caregiving experiences, e.g. dressing. • Beginning to understand 'yes', 'no' and some boundaries. 	<ul style="list-style-type: none"> • Is comforted by touch and people's faces and voices. • Seeks physical and emotional comfort by snuggling into trusted adults. • Calms from being upset when held, rocked, spoken or sung to with soothing voice. • Shows a range of emotions such as pleasure, fear and excitement. • Reacts emotionally to other people's emotions, e.g. smiles when smiled at and becomes distressed if hears another child crying.

Social, Emotional and Mental Health Descriptors Foundation Stage Children's Characteristics 2 – 3 years			
Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	Child meets criteria for request for an Education, Health and Care Plan Birth – 11 months band
Making relationships	<ul style="list-style-type: none"> Plays alongside others. Uses a familiar adult as a secure base from which to explore independently in new environments, e.g. ventures away to play and interact with others, but returns for a cuddle or reassurance if becomes anxious. Plays cooperatively with a familiar adult, e.g. rolling a ball back and forth. 	<ul style="list-style-type: none"> Seeks to gain attention in a variety of ways, drawing others into social interaction. Builds relationships with special people. Is wary of unfamiliar people. Interacts with others and explores new situations when supported by familiar person. Shows interest in the activities of others and responds differently to children and adults, e.g. may be more interested in watching children than adults or may pay more attention when children talk to them. 	<ul style="list-style-type: none"> Enjoys the company of others and seeks contact with others from birth. Gazes at faces and copies facial movements, e.g. sticking out tongue, opening mouth and widening eyes. Responds when talked to, for example, moves arms and legs, changes facial expression, moves body and makes mouth movements. Recognises and is most responsive to main carer's voice: face brightens, activity increases when familiar carer appears. Responds to what carer is paying attention to, e.g. following their gaze. Likes cuddles and being held: calms, snuggles in, smiles, gazes at carer's face or strokes carer's skin.

Social, Emotional and Mental Health Descriptors Foundation Stage Children's Characteristics 3 – 4 years			
Early Years Foundation Stage 2014	Stage One 22 - 36 months band	Stage Two 16 - 26 months band	Child meets criteria for request for an Education, Health and Care Plan 8 – 20 months band
<u>Personal Social and Emotional Development</u> Self confidence and self awareness	<ul style="list-style-type: none"> • Separates from main carer with support and encouragement from a familiar adult. • Expresses own preferences and interests. • May sit independently for a short group activity, where the activity is personally meaningful, (e.g. for song - or story-time, snack-time). • Independent play shows some organisation and purpose, but this is often limited for their age (e.g. fills container with sand, empties it into a smaller container and observes over-spill, then repeats and extends the action; builds a simple bridge using blocks; completes a two - to four-piece interlocking puzzle). 	<ul style="list-style-type: none"> • Explores new toys and environments, but 'checks in' regularly with familiar adults as and when needed. • Gradually able to engage in pretend play with toys (supports child to understand their own thinking may be different from others). • Demonstrates sense of self as an individual, e.g. wants to do things independently, says "No" to adult. • May sit independently for a short group activity with some verbal or visual prompts to focus. • Additional structure and adult support needed for less intrinsically-motivating group activities. • Limited purposeful independent play for their age (e.g. briefly relates two or more objects in a purposeful way, such as putting the lid on a teapot; briefly explores properties of materials and items, such as filling a container with bricks, sand, putting rice in a truck, squashing play-dough and using a knife or cutter on it). 	<ul style="list-style-type: none"> • Enjoys finding own nose, eyes or tummy as part of naming games. • Learns that own voice and actions have effects on others. • Uses pointing with eye gaze to make requests, and to share an interest. • Engages other person to help achieve a goal, e.g. to get an object out of reach. • Unable to benefit from group learning opportunities or play independently for sustained periods because of level of development. • Very limited purposeful play for their age (e.g. exploring objects using their senses, feeling them, banging them together to make sounds, mouthing, shaking, hitting them with a hammer, investigating cause and effect. May be beginning to relate two or more objects together once it has been modelled for them by an adult).

Making relationships	<ul style="list-style-type: none"> • Can play in a group, extending and elaborating play ideas, e.g. building up a role-play activity with other children. • Initiates play, offering cues to peers to join them. • Keeps play going by responding to what others are saying or doing. • Demonstrates friendly behaviour, initiating conversations and forming good relationships with peers and familiar adults. 	<ul style="list-style-type: none"> • Interested in others' play and starting to join in. • Seeks out others to share experiences. • Shows affection and concern for people who are special to them. • May form a special friendship with another child. 	<ul style="list-style-type: none"> • Plays alongside others. • Uses familiar adult as a secure base from which to explore independently in new environments, e.g. ventures away to play and interact with others, but returns for a cuddle or reassurance if becomes anxious. • Plays cooperatively with a familiar adult, e.g. rolling a ball back and forth.

SENSORY AND/OR PHYSICAL NEEDS

Introduction:

The SEN & Disability Code of Practice 2014

Some children and young people require special educational provision because they have disability which prevents or hinders them from making use of the educational facilities generally provided. These difficulties can be age related and may fluctuate over time. Many children and young people with vision impairment (VI), hearing impairment (HI) or a multi-sensory impairment (MSI) will require specialist support and/or equipment to access their learning, or habilitation support. Children and young people with an MSI have a combination of vision and hearing difficulties. 6.34

Hearing Impairment

Some children are born deaf and others may become deaf later in life, for example as a result of an illness. The two main types of deafness are Conductive Deafness and Sensorineural Deafness. Conductive deafness is the most common amongst young children and is usually but not always caused by fluid building up in the middle ear, preventing sounds from passing through the middle ear to the outer ear in the inner ear, this type of deafness is also referred to as 'glue ear' and will generally be a mild to moderate loss.

NB; a moderate hearing loss can have a significant impact on language acquisition especially if the loss is over a long time period and/or has gone un-diagnosed during the

child's formative years. Antibiotics or grommets can alleviate this, at least temporarily, and most children will out-grow middle-ear infection. Whilst the child is subject to 'glue ear' (congested), they will have a hearing-impairment. Sensorineural hearing loss is caused by damage to the inner ear or auditory nerve and cannot be treated, so the hearing loss is permanent. Sensorineural hearing loss can range in severity described depending on the degree of the loss, as mild, moderate, severe or profound. In the majority of cases hearing aids will be prescribed by the child's audiology department. This will amplify sound but will not necessarily improve the quality of the speech heard. Children with a Sensorineural hearing loss can also suffer from 'glue ear'. When this happens residual aided hearing will be affected resulting in a further reduction in access to sounds. Children with a combination of both types of deafness will be referred to as suffering a sensorineural loss with a conductive overlay.

Within the learning environment good acoustics are crucial if the child is to access directed speech and incidental (overheard) language effectively. If the environment is subject to high levels of background noise, such as the radio playing loudly all day or external sources of noise, speech will be masked, which will impact on the hearing impaired child's access and therefore their ability to develop language competency.

Further information regarding acoustics can be found within the National Deaf Children's Society (NDCS) or via Harlington Area School Trust's (HAST) peripatetic hearing impairment service.

The National Deaf Children's Society, in their Deaf Friendly Teachers Training Pack says, 'Children develop communication, learning and social skills in their day-to-day activities. The impact of deafness on these areas will be different for individual children. No two deaf children are the same and any levels of deafness can affect a child's access to their environment.

Deafness is likely to affect a child's ability or willingness to:

- Initiate conversations.
- Use appropriate language.
- Express their feelings and emotions.
- Be fully included in large groups.
- Develop confidence and self-esteem.
- Learn appropriate social behaviour incidentally.

Visual Impairment

Some children are born with a severe visual impairment; others may become visually impaired during their school years, for example due to genetic causes or accidents. The severity of the visual impairment can differ widely

SENSORY AND/OR PHYSICAL NEEDS

The SEN & Disability Code of Practice 2014

amongst children who have the same condition. Prescription glasses may help improve a child's vision but may not fully correct the child's vision. Glasses may not be easily tolerated by a child. A visual impairment may be caused by a problem in the eye itself (e.g. cornea, retina), the optic nerve, visual cortex or the muscles surrounding the eye.

"Vision acts as a bridge between information from our other senses.

Sight unifies, co-ordinates and is informed by input from touch and hearing. Vision perception is a major area of activity for the human brain. It has been estimated that between 70% - 80% of the total information the brain receives comes from the visual pathways".

Olga Miller: Supporting Children with Visual Impairment in mainstream schools.

A severe visual impairment might affect a child's opportunity to:

- Move about freely.
- Learn about the immediate environment.
- Learn about the wider environment.
- Access learning in and out of school.
- Be completely independent.
- Be an active member of a peer group.

- Develop confidence and self esteem.
- Learn appropriate social behaviour.

Physical Difficulties

Children with physical difficulties are all affected in different ways. Some children can walk, sit up and talk, although they may take longer to develop these skills. Other children may require a high level of support to enable them to be fully included.

Some children with physical difficulties may also have learning difficulties or other difficulties such as a hearing or visual impairment, or speech, language and communication difficulties. They may also have a medical condition, for example, epilepsy.

A physical difficulty might affect a child's opportunity to:

- Make use of the furniture and equipment generally available in the nursery.
- Move about freely.
- Communicate effectively.
- Be an active member of a peer group.
- Be included in all areas of the curriculum.

SENSORY AND/OR PHYSICAL NEEDS

The SEN & Disability Code of Practice 2014

Many of these children will require some of the following:

- Appropriate seating.
- Adaptations to the physical environment of the setting.
- Access to alternative or augmented forms of communication.
- Access to specialist equipment/materials.
- Adult support.
- Regular and frequent access to specialist support.

It is important for children with physical disabilities to be supported in gaining as much independence as possible and, therefore, they may need a high level of adult support initially. For example, a child may need help in learning to use the toilet independently, to safely use outdoor equipment or to change footwear.

If a child has a medical condition a detailed **care plan** should be written in consultation with parents and the outreach nurse or other suitable medical practitioner. It should be kept up to date, and a copy held in the setting.

Hearing Impairment Provision Characteristics

Stage One	Stage 2
<p>Parent's/carers' and child's participation</p> <ul style="list-style-type: none"> • Parents/carers contribute to assessment. • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home. • The views of the child are taken account of. • Opportunities for parents/carers to learn how to help their child further. • Enhanced contact for parents with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in sitting. • Parents/carers are informed about the Local Offer and Parent Partnership Service. <p>Assess, plan, do review</p> <p>This process of Assessment, planning and review may need to take account of the child's attendance at more than one setting.</p> <ul style="list-style-type: none"> • Setting supplements their normal systems of assessment, planning and reviewing by further observation in order to understand child's current interests, developments and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting), e.g. outdoor environment, at lunchtime. • Planning of intervention involving the parent/carer, child, setting SENCo, key person, and takes account of any existing advice from a Qualified Teacher of the deaf (QTOD). • SEND Support Plan with SMART targets, which take account of specialist advice. • Half termly (approximately 6 weekly) review of child's progress. 	<p>Parent's/carers' and child's participation</p> <ul style="list-style-type: none"> • Parents/carers contribute to assessment. • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home. • The views of the child are taken account of. • Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and experience. • Enhanced contact for parents with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in sitting. • Parents/carers are informed about the Local Offer and the Parent Partnership Service. <p>Assess, plan, do review</p> <p>Assessment, planning and review may need to take account of the child's attendance at more than one setting.</p> <ul style="list-style-type: none"> • Ongoing observation undertaken in order to understand the child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting • Planning of intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies (QTOD). • SEND Support Plan with SMART targets, which take account of specialist advice. • Half-termly review of child's progress. • Input or attendance made by appropriate external agencies to reviews.

Hearing Impairment Provision Characteristics

Stage One

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.
- Additional adult support and/or attention for group activities where relevant.
- Consideration given to acoustic environment minimising background noise.

Additional human and other resources

- Additional adult attention and/or support for some activities, including planned and agreed targets, from practitioners already working in the setting.
- Supervision and monitoring of SEND Support Plan by SENCo/QTOD.
- Support for some activities, including planned targets, from practitioners already working in the setting, to ensure access and encourage independence.

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and out, with increased differentiation of activities, availability of resources and materials, to reflect child's hearing needs.
- Limited modifications to, and differentiation of the setting, to ensure access.

Stage 2

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.
- Additional adult attention and/or support for group activities.
- Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on planned targets.
- Consideration given to acoustic environment / minimise background noise.
- Consideration given to the position of the child in relation to the speaker giving the child the best opportunity to see speaker's face and hear at optimal level.

Additional human and other resources

- Additional adult attention and/or support for some activities, including planned and agreed short term targets.
- Supervision and monitoring of SEND Support Plan by SENCo/QTOD.
- Time allocated for key person and SENCo to liaise with external agencies.
- Space for storage facilities for pupil's specific equipment.
- Regular staff support and/or specialist teaching needed.

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and out, with increased differentiation of activities, availability of resources and materials, to reflect child's hearing needs.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified through QTOD.
- The child may need individual materials to ensure appropriate access.

Hearing Impairment Provision Characteristics

Stage One	Stage 2
<p>Training and advice</p> <ul style="list-style-type: none"> • Staff training needs are addressed by QTOD and information is passed to other staff and parents as appropriate. This will help to inform planning. • Ongoing parental involvement and support. • Liaison with other agencies as appropriate. 	<p>Training and advice</p> <ul style="list-style-type: none"> • Support and advice concerning the educational impact of the child's hearing impairment for staff from a QTOD. This informs planning. • Staff attend training and disseminate information to appropriate members of staff. • Advice sought on an on going basis from a QTOD. • Ongoing parental involvement and support. • Practitioners knowledgeable about voluntary agencies/support groups who can give advice/support to parents/carers.

<p>Parents/carers' and child's participation</p> <ul style="list-style-type: none"> • Parents/carers contribute to assessment. • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home. • The ascertainable views of the child are taken account of. • Opportunities for parents/carers to learn how to help their child further. • Parents/carers are informed about the Local Offer and Parent Partnership Service. <p>Assess, plan, do review</p> <p>Assessment, planning and review may need to take account of the child's attendance at more than one setting:-</p> <ul style="list-style-type: none"> • Setting supplements their normal systems of assessment, planning and reviewing by further observation in order to understand child's current interests, developments and learning needs (i.e. needs that are additional or different from what is usually provided for all children within the setting), e.g. outdoor environment, at lunchtime. • Planning and intervention involving the parent/carer, child, setting SENCo, key person, and takes account of any existing advice from a Qualified Teacher of the Visually impaired (QTVI). • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews. • Half termly (approximately 6 weekly) review of child's progress. 	<p>Parents/carers' and child's participation</p> <ul style="list-style-type: none"> • Parents/carers contribute to assessment. • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home. • The ascertainable views of the child are taken account of. • Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence. • Enhanced contact for parents with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting. • Parents/carers are informed about the Local Offer and Parent Partnership Service. <p>Assess, plan, do review</p> <p>Assessment, planning and review may need to take account of the child's attendance at more than one setting:-</p> <ul style="list-style-type: none"> • Ongoing observation undertaken in order to understand the child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting. • Planning and intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies (QTVI). • Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews. • Half-termly review of child's progress. • Input or attendance made by appropriate external agencies to reviews.

Visual Impairment Foundation Stage Provision Characteristics

Stage One

Stage Two

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.
- Additional adult support and/or attention for group activities where relevant.
- Appropriate position considered for each activity.

Additional human and other resources

- Additional adult attention and/or support for some activities, including IEP targets, from practitioners already working in the setting.
- Supervision and monitoring of SEND Support Plan by SENCo.
- Support for some activities, including targets, from practitioners already working in the setting, to ensure access and encourage independence.
- Use of standard and some modified materials.
- Modification to the visual environment, e.g. lighting, contrast.

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.
- Additional adult attention and/or support for group activities.
- Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on planned targets.
- Appropriate position considered for each activity.

Additional human and other resources

- Additional adult attention and/or support for some activities, including IEP targets.
- Supervision and monitoring of SEND Support Plan by SENCo/QTVI.
- Space for storage facilities for pupil's specific equipment.
- Regular staff support and/or specialist teaching needed.
- Access to specialist VI equipment and resources, as appropriate.
- Suitable lighting and seating.

Visual Impairment Foundation Stage Provision Characteristics

Stage One

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with increased differentiation of curriculum access and materials, to reflect child's visual needs.
- Limited modifications to and differentiation of the setting to ensure access.

Training and advice

- Staff training needs are addressed by QTVI and information is passed to other staff and parents as appropriate. This will help to inform planning.
- Liaison with other agencies as appropriate.

Stage Two

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with increased differentiation of curriculum access and materials, to reflect child's visual needs.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified by QTVI.
- The child may need individual materials to ensure appropriate access.

Training and advice

- Support and advice concerning the educational impact of the child's visual impairment for staff from a QTVI. This informs planning.
- Staff attend training and disseminate information to appropriate members of staff.
- Advice sought on an ongoing basis from a QTVI.
- Ongoing parental involvement and support.
- Practitioners knowledgeable about voluntary agencies/support groups who can give advice/support to parents/carers.

Visual Impairment Descriptors			
Early Years Foundation Stage 2014	Stage One	Stage Two	Child meets criteria for request for an Education, Health and Care Plan if described by one or both of the shaded descriptors in this column
Degree of Visual Impairment	<ul style="list-style-type: none"> Slightly reduced vision in one or both eyes which could affect learning. 	<ul style="list-style-type: none"> Correct vision is 6/18 or worse in both eyes. Child has a known deteriorating visual condition. Child has a significant visual field defect which could affect learning. 	<ul style="list-style-type: none"> Child has a significant visual impairment and/or is registered as Sight Impaired or Severely Sight Impaired. Requires the need for extensively modified materials. For example print size of 24 and above, enlarged screen environment and/or specialist software to enable access to computers.
Personal, Social and Emotional Development	<ul style="list-style-type: none"> Shows increasing confidence in new situations. Expresses needs and feelings appropriately. Has a sense of personal identity. Forms good relationships with other children and staff. 	<ul style="list-style-type: none"> Needs some adult support to help form good relationships with other children, for example to learn their names; to appreciate personal space. 	<ul style="list-style-type: none"> Specific attention to social [care] support needed. There may be concern about the child's ability to initiate and maintain social relationships due to the visual impairment.

Visual Impairment Descriptors

	Stage One	Stage Two	
Expressive art and design	May need verbal prompts or occasional physical support from an adult. Child may not often choose craft and other fine motor activities.	Needs some individual physical support and verbal prompts from an adult. Child may not choose craft and other fine motor activities spontaneously.	Child may need support to operate and use a range of materials and equipment safely.
	Child explores and uses a range of materials safely.	Child needs help to use a range of materials safely and encouragement to use soft / messy materials.	
	Child can operate and use all equipment safely with initial adult support.	Child needs help or support to operate and use equipment safely.	
	Child may need enlarged screen environment and some modified equipment e.g. dark pens.	Child may need enlarged screen environment and/or specialist software to increase access to computers.	
Physical Development	Child can explore the environment independently and can negotiate the space and objects around them.	Child can explore the environment independently and is becoming aware of how to negotiate the space and objects around them. Sometimes needs adult support.	Individual support needed to learn skills for independence / mobility.
Moving and handling	Showing increasing control in using equipment for climbing, scrambling, sliding and swinging. May need some additional supervision when using unfamiliar equipment.	Needs adult support or supervision to safely use equipment for climbing, scrambling, sliding and swinging.	
Health and self care	Shows awareness of own needs with regard to eating and hygiene but may need some initial adult support.	Shows awareness of own needs with regard to eating and hygiene but needs some adult support to meet those needs.	Needs specific guidance due to visual impairment to attend to these needs and to develop independence.

Visual Impairment Descriptors			
Feeding	Stage One <ul style="list-style-type: none"> • Feeds self using fingers or utensils but may need some adult support (e.g. verbal encouragement). • Can place used crockery on table. 	Stage Two <ul style="list-style-type: none"> • Is able to feed self using fingers or utensils but may need individual physical support and/or supervision. • May need assistance or verbal prompts to place used crockery in correct place. 	
Washing	Can wash and dry hands but may need verbal prompts.	Actively co-operates with washing and drying hands but may need adult support, e.g. to find hook / soap.	
Dressing	Can dress and undress self, in line with sighted pupils.	Needs help to organise clothes and help with fastenings etc.	
Toileting	Can use facilities with minimal help from adult.	Can use facilities with help from adult.	

Physical Difficulties Provision Characteristics

Stage One

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of the child are taken account of.
- Opportunities for parent/carers to learn how to help their child further.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do review

Assessment, planning and review may need to take account of the child's attendance at more than one setting.

- Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, at lunchtime.
- Planning intervention involves the parent/carer, child, setting SEN-Co, key person, and takes account of any existing advice from Health professionals (e.g. Physiotherapist, Occupational Therapist).
- SEND Support Plan with SMART targets, which take account of specialist advice.
- Half termly (approximately 6 weekly) review of child's progress towards planned outcomes...

Stage Two

Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in SEND Support Plan, setting targets, monitoring progress and reviews, and be involved in supporting targets in the home.
- The views of the child are taken account of.
- Opportunities for parent/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence.
- Enhanced contact for parents/carers with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about the Local Offer and Parent Partnership Service.

Assess, plan, do review

Assessment, planning and review may need to take account of the child's attendance at more than one setting.

- Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning of intervention involving the parent/carer, child, setting SEN-Co, key person and external agencies.
- SEND Support Plan with SMART targets, which take account of specialist advice.
- Half termly (approximately 6 weekly) review of child's progress towards planned outcomes.
- Input or attendance made by appropriate external agencies to reviews.

Physical Difficulties Provision Characteristics

Stage One

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to all play and learning activities and focus available adult support where needed.
- Additional adult attention and/or support for group activities where relevant.

Additional human and other resources

- Additional adult attention and/or support for some activities, including planned and agreed targets, from practitioners already working in the setting.
- Supervision and monitoring of SEND Support Plan by SENCo.
- Adaptations to buildings as appropriate (e.g. ramps, handrails in toilets).
- Storage space for specialist equipment (e.g. wheelchair, standing frame).
- Other children are supported in understanding the child's needs and engaging respectfully and helpfully with them.
- Access to some specialist equipment/materials (e.g. scissors, sloping boards, pencil grips) if appropriate.

Stage Two

Quality learning experiences

- Grouping strategies used flexibly to enhance learning and access to all play and learning activities and focus available adult support where needed.
- Additional adult attention and/or support for group activities.
- Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on planned SMART targets.

Additional human and other resources

- Additional adult attention and/or support for some activities, including planned and agreed targets, and the development of independence.
- Supervision and monitoring of SEND Support Plan by SENCo.
- Adaptations to buildings as appropriate (e.g. ramps, handrails in toilets).
- Storage space for specialist equipment (e.g. wheelchair, standing frame).
- Other children are supported in understanding the child's needs and engaging respectfully and helpfully with them.
- Access to ICT and specialist equipment/materials (e.g. scissors, sloping boards, pencil grips) if appropriate.
- Consideration given to enabling access, through ensuring resources are at an appropriate level and additional space is provided, as necessary.

Physical Difficulties Provision Characteristics

Stage One

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with developmentally appropriate resources, and or differentiation for access to all activities. Possibly some specific reinforcement or skill-development activities in support of planned SMART targets.
- Differentiation through setting of appropriate learning and development targets.
- Allowance of additional time to respond, complete activities and consolidate learning.

Training and advice

- Staff training needs are addressed and information passed to other staff and parents.
- One-off advice may be sought from the Psychology & Advisory Support Team and informs planning.

Stage Two

Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with developmentally appropriate resources, with increased differentiation for access to all activities and materials, to reflect child's developmental and language levels, with key learning outcomes identified in the child's SEND Support Plan.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials, as identified through involvement of external agencies.

Training and advice

- Staff training needs are addressed, including lifting and handling training if appropriate, and information passed to other staff and parents.
- Advice is sought on an ongoing basis from the Psychology & Advisory Support Team and from Health Professionals (e.g. Physiotherapist, Occupational Therapist), and informs planning.
- Practitioners knowledgeable about voluntary agencies / support groups who can give advice/support to parents/carers.

Physical Difficulty Descriptors Foundation Stage Children's Characteristics 2 – 3 years			
Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	Child meets criteria for request for an Education, Health and Care Plan Birth – 11 months band
<u>Physical Development</u> Moving and Handling	<ul style="list-style-type: none"> • Walks upstairs holding hand of adult. • Comes downstairs backwards on knees (crawling). • Beginning to balance blocks to build a small tower. • Makes connections between their movement and the marks they make. 	<ul style="list-style-type: none"> • Sits unsupported on the floor. • When sitting, can lean forward to pick up small toys. • Pulls to standing, holding on to furniture or person for support. • Crawls, bottom shuffles or rolls continuously to move around. • Walks around furniture lifting one foot and stepping sideways (cruising), and walks with one or both hands held by adult. • Takes first few steps independently. • Passes toys from one hand to the other. • Holds an object in each hand and brings them together in the middle, e.g. holds two blocks and bangs them together. • Picks up small objects between thumb and fingers. • Enjoys the sensory experience of making marks in damp sand, paste or paint. • Holds pen or crayon using a whole hand (palmar) grasp and makes random marks with different 	<ul style="list-style-type: none"> • Turns head in response to sounds and sights • Gradually develops ability to hold up own head • Makes movements with arms and legs which gradually become more controlled • Rolls over from front to back and back to front. • When lying on tummy becomes able to lift first head and then chest, supporting self with forearms and then straight arms. • Watches and explores hands and feet, e.g. when lying on back lifts legs into vertical position and grasps feet. • Reaches out for, touches and begins to hold objects. • Explores objects with mouth, often picking up an object and holding it to the mouth.
