As such, work-related driving in as defined by this policy includes all journeys:

- made using school owned / managed minibuses; and / or

When carrying out work-related driving, the vehicle becomes the workplace. As such Houghton Conquest Lower School has a duty to ensure that employees and others are protected from harm which may arise from the condition of their workplace or the activities that they carry out.

All staff, before driving any vehicle for work purposes, must first evidence:

- their competency to drive school or personally owned vehicles (through their driver’s license);

## Work at height

Falls from height are a common cause of injuries at work, often where the work at height is of short duration and from 'low' heights of less than 2 meters. Common causes of accidents when working at height include:

- overreaching or over balancing;
- climbing with loads;
- using inappropriate equipment to access areas / carry out work at height (e.g. desks, chairs, etc.);
- not ensuring that work at height access equipment is securely fixed in place;
- placing access equipment on unsuitable surfaces;
- falls from roofs with unprotected edges; and
- falls through fragile materials (e.g. skylights).

Houghton Conquest Lower School is committed to carrying out its duties under the Work at Height Regulations in order to ensure, so far as is reasonably practicable, the safety of staff, pupils and visitors carrying out or (being in the vicinity of those carrying out) work at height activities.

The principle applied by Houghton Conquest Lower School is that work at height must always be avoided unless it is not reasonably practicable to do otherwise; if work from height cannot be avoided, the risks associated with it must be assessed before proceeding.

School roofs, even if able to support human weight, are classed as fragile if unguarded skylights are present.

The risks from unauthorised access to places of height have been assessed and reasonably practicable measures taken to mitigate those risks. Logical access points are signed accordingly.

Risks from contractor work at height activities are assessed and managed in line with the '[Contractors](#)' section of this policy.

**The Head Teacher** is responsible for:

- ensuring that managers and staff are made aware of the arrangements and requirements for working at height;
- ensuring that all those members of staff involved in undertaking higher risk work at height **and / or** planning, organising or supervising work at height **and / or** inspecting work at height access equipment have received appropriate formal training; and

- the use of access equipment is controlled by the school's competent persons for working at height;
- all those involved in work at height are competent to do so;
- the risks from working at height are assessed and appropriate equipment is selected and purchased (this includes access equipment, equipment safety devices and personal protective equipment);
- a register of access equipment is maintained;
- all access equipment is formally visually inspected on a quarterly basis;
- all access equipment is, as required, repaired and subject to periodic maintenance and inspection in line with the manufacturer's guidance; and
- the risks from fragile surfaces or unauthorised access to places at height is properly controlled.

**The Caretaker**, as competent persons trained in ladder use / inspection and working from height, are responsible for:

- assisting **The School Business Manager** in the review, creation and implementation of task-specific method statements for all higher risk work at height they may carry out;
- assisting with the quarterly access equipment inspection process;
- carrying out higher risk activities at height, in line with training received and associated task-specific risk assessment(s) and method statement(s);
- assessing whether low level, low risk and short duration work at height tasks, which require the use of a low-level stepladder or short leaning ladder, may proceed under the school's general low risk work at height risk assessment and providing access to suitable equipment and support if so;
- supervising work at height activities being carried out by school staff or contractors; and
- ensuring the appropriate storage of access equipment.

**All staff** are responsible for:

- undertaking work at height only where they are competent to complete the planned task **and** have received the appropriate level of information, instruction and training to do so;
- planning and carrying out any work at height in line with the requirements of this policy and associated risk assessment(s) and method statement(s);
- ensuring that they carry out pre-use visual safety checks on equipment to be used and take out of use any equipment found to be defective, reporting it to **The School Business Manager**; and
- ensuring that kick-stools, where stored in their classroom or area (or otherwise under their control), are appropriately stored so that they cannot be accessed by pupils and unauthorised persons.

## **Work equipment**

**The School Business Manager** is responsible for:

The CBC Assets Team monitors compliance for plant and equipment associated with property health and safety and requires all Community and Voluntary Controlled schools not using the Property Buy Back Scheme to submit confirmation of compliance on at least an annual basis.

**All staff** must ensure that they visually check work equipment for defects before use and that they only use work equipment that they are authorised and competent to use, in line with risk assessments and agreed procedures.
